EXPERIENCE

Full Stack Developer, Host A Hero

September 2019 - February 2020

As part of Tent Hut, Host a Hero, is a platform designed for hosts to accommodate military service members and veterans with short-term lodging.

Produced a fully working Host Profiles page for current users, admin, and by Id for guests and other Hosts:

- built host profiles portal designed and developed templates based on the user roles in order to present the proper template to the user.
- Created a search feature for the admin portal for which created stored procedure and SQL data tables.

Created a messaging component that allowed for tenants to communicate directly with their Hosts:

- implemented the principals of DRY when creating feature in order to optimize code base.

Managed UX design and CSS styling for entire website for optimal flow.

EDUCATION

Portland State University

B.S. Health Science

Cryptologic Linguist, USMC

August 2010 - August 2015

I earned my humanitarian ribbon in the Philippines and South Korea. I trained to work as a team member, being one of the pioneering women working with infantry to de-crypt and analyze real-time data from radio and cellphone frequencies. Most software and technologies used were to assist in the collection and storage of mass data analysis. I was honorably discharged as a Corporal (E-4).
